Product Description

What is 99% Purity Cosmetic GSSG/L-Glutathione Oxidized Glutathione For Skin Whitening?

Glutathione oxide (GSSG) is an oxidised version of the naturally occurring and very important antidote glutathione (GSH). When used in the body, GSSG does not remain oxidised but is reduced to GSH. The ratio of GSH to GSSG can be used to determine the level of oxidative stress occurring within a cell. When a cell has a higher level of GSSG, it can suggest that more oxidative stress is occurring within the cell.
